Who We Are?

Metabolism and Target Organ Damage (M&TOD), https://mtodjournal.net/, ISSN: 2769-6375 is an international peer-reviewed, open access, online journal which provides an online platform for publication of clinical, basic and translational studies. It covers (cardio)-metabolic disorders per se, such as obesity, diabetes, dyslipidemias, arterial hypertension and hyperuricemia in all age groups. Of note, this journal will emphasize the role of these metabolic disorders as either effectors/amplifiers or consequences of the development and progression of injuries to target organs including but not limited to the cardiovascular system, the liver, kidneys and the pancreas. Specific applications in metabolic disorders are as follows: history of disease, epidemiology, prevention, natural history, genetics, cell and molecular biology, pathobiology, physiology, anatomic pathology, clinical chemistry, pharmacological chemistry, pharmacology, psychology, psychiatry, statistics and immunology.

Journal Advantages

- Gold Open Access. All articles published are made freely and permanently accessible online immediately from the date of publication.
- Provide authors with high-quality peer review reports to help them further improve the manuscript quality promptly.
- The Article Processing Charge will be exempted for all invited manuscripts to support the early development of M&TOD.
- All articles are published under the CC BY 4.0 Agreement, and the copyright of the articles belongs to the author.
- We will provide multiple international promotion platforms to increase the exposure of articles.
- Winner(s) of the "Best Paper Award" will be awarded. The reward will be in the form of a cash prize and a certificate.

Conference/Institute Cooperation

- Free publicity for the conference on various journal promotion platforms;
- APC’s for papers from conferences will be waived after acceptance;
- We will provide free E-book production for the conference/institute special issues;
- The journal sponsors the best oral/presentation awards initiated by conferences/institutes, and the reward will be in the form of a cash prize and a certificate;
- Winners of the conference will have the opportunity to join the journal and participate in online communication with experts worldwide.

About OAE

OAE Publishing Inc. (OAE) is a multidisciplinary open-access publishing company. It was founded in Los Angeles, USA, on March 17, 2015, with the shares held by the Mesa Investment Management Inc. Through continuous capital investment, we are striving to achieve the great mission of "con structing a scientific and standard publishing process, building a more open and transparent publishing ecology in combination with the thought of big data, publishing influential academic journals and books, disseminating valuable academic content, and promoting scientific innovation".

Based on efficient management operations, so far, about 1200 distinguished scholars from famous universities and research institutions have been involved in OAE’s 30 journals, 8 fields, including medicine, materials science and engineering, engineering technology, cell biology, infectious diseases and public environmental health, and digital medicine. All articles published by OAE journals are made freely and permanently accessible online immediately from the date of publication. OAE Website: https://oaeypublish.com

Article Type

Original Article, Review, Case Report, Commentary, Mini-Review, Systematic Review, Meta-analysis, Editorial, Perspective, Opinion, Communication, Letter and Research Highlight. We sincerely welcome scholars in related fields to contribute their manuscripts to M&TOD!
